Grass Catcher

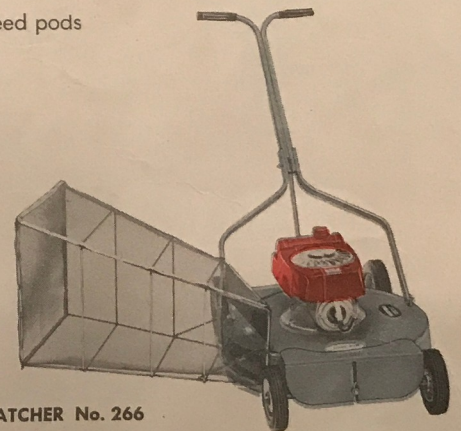

CATCHER No. 85A

Illustrated on Mow-Blo 20G-5

You have your choice — to MULCH or to CATCH your grass . . . with Sensation Mow-Blo or Econo-Mow mowers. If for any reason you want to catch the grass, a light strong grass catcher can be attached. Grass catchers are pictured and described on this page.

1. For all Mow-Blo and Econo-Mow models— all sizes Gas or Electric.
2. Impact (air-Blast) loading provides high capacity. Vacuum cleans yard.
3. Quickly detachable for emptying.
4. Chassis supports load. No handle interference.
5. Angle of attachment keeps grass catcher out of operator's path.
6. Catches grass clippings, weed seed pods
7. Picks up leaves.
8. Steel frame, mesh covered.
9. Weighs only 3 pounds. Easy to empty.
10. Individually boxed. Shipping weight 11 pounds.

INSTRUCTIONS FOR INSTALLING SENSATION
GRASS CATCHERS
ON 18" & 20" MOW-BLO MOWERS

Reference:

Serial Number 58608 on all 20" Mow-Blo
Serial Number 57076 on CP 18 Mow-Blo
Serial Number 56909 on 18GC Mow-Blo

For the purpose of these instructions, all Mow-Blo units with serial numbers lower than those shown above will be referred to as "early models".

On early models the metal plate on bottom side of discharge spout must be cut and turned up. Grass Catcher will not fill properly without this being done. On later models this is standard equipment.

To rework plates on early models simply cut plate back at rear of spout about 2" and bend up 1".

On CP18 and 18GC Mow-Blos, early models, mounting holes for cross frame must be relocated. Template (or pattern) is attached. This is to do away with long extension bolt for wheel and riser block that was previously used.

To install Grass Catcher:

1. Mount cross frame "A" on top of discharge spout with bolts provided.
2. Insert 24" piece of tubing "B" over end of cross frame "A" line up holes in cross frame & Tubing, & insert hair pin "C".
3. Fasten basket on frame by first slipping ring at large end of basket over tube and then inserting extensions at small end of basket into hole in cross arm "A".
4. Insert hair pin "A" into hole in tube behind ring on basket. Grass Catcher is now ready for use.
5. To remove basket to empty, simply remove hair pin "D" from tube and slide basket off of frame.

Template to relocate holes for proper mounting of Grass Catcher cross frame on 18GC & CP18 Mow-Blo.

Locate circles marked "Present Holes" exactly over holes now in your casting. An easy method of holding this template in place is to insert bolts through "Present Holes" in template and on through the casting holes.

With the template firmly in position, mark casting at the two circles marked "Holes to be Drilled."

LEAF GRINDER ATTACHMENTS

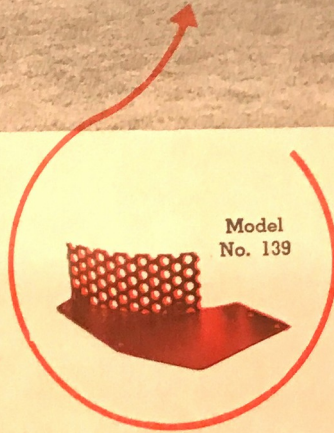

ELIMINATES RAKING, PILING, BURNING AND HAULING AWAY. SAVES THE BACK-BREAKING, TIME-CONSUMING WORK OF OLD FASHIONED LEAF DISPOSAL.

Leaves contain nitrogen, phosphorous, potassium, calcium and other plant-food elements. These are the materials essential for better lawns. Don't BURN your leaves! Put them to WORK ON YOUR LAWN!
