SENSATION AIR CLEANER PARTS LIST

MODEL 3XAC-0

The following parts are replacement parts obtained from your Briggs & Stratton Service Center.

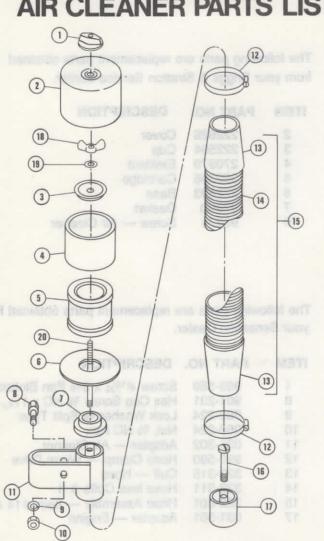

ITEM	PART NO.	DESCRIPTION
2	222626	Cover
3	222594	Cup
4	270979	Element
5	392308	Cartridge
6	222593	Base
7	27660	Gasket
16	93374	Screw — Air Cleaner

The following parts are replacement parts obtained from your Sensation Dealer.

ITEM	PART NO.	DESCRIPTION
1	999-589	Screw #1%2 x 3% Pan Slotted
8	901-231	Hex Cap Screw 3/8 NC x 11/2
9	982-224	Lock Washer 3/8 Split Type
10	960-224	Nut, % NC Hex
11	031-302	Adapter — Air Cleaner
12	999-590	Hose Clamp — Worm Drive
13	323-315	Cuff — Hose
14	323-311	Hose less Cuffs 3 ft
15	322-301	Hose Assembly - Item #14 & #13
17	031-301	Adapter — Engine

Fits all models except Hi Wheelers, Self Propelled Mowers, and Riders.

MODEL 3XAC-2

The following parts are replacement parts obtained from your Briggs & Stratton Service Center.

ITEM	PART NO.	DESCRIPTION
1 2 3 4 5 6 7	212292 222626 222845 270979 392308 222593 27660	Knob Cover Cup Element Cartridge Base Gasket
16 18 19 20	93374 93856 271118 231176	Screw — Air Cleaner Wing Nut Washer Stud

The following parts are replacement parts obtained from your Sensation Dealer.

ITEM	PART NO.	DESCRIPTION
8	901-231	Hex Cap Screw % NC x 11/2
9	982-224	Lock Washer 3/8 Split Type
10	960-224	Nut, 3/8 NC Hex
11	031-302	Adapter — Air Cleaner
12	999-590	Hose Clamp — Worm Drive
13	323-315	Cuff — Hose
14	323-328	Hose less Cuffs 4 ft
15	322-303	Hose Assembly — Item #14 & #13
17	031-301	Adapter — Engine

Fits all models except Hi Wheelers and Riding mowers.

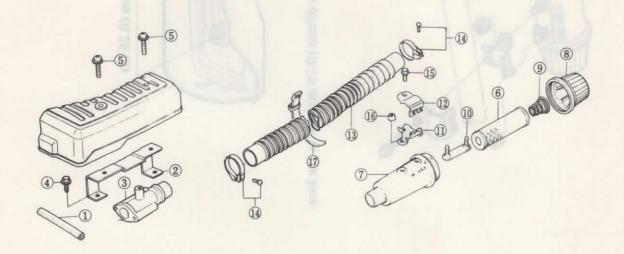

To use this kit on models other than the 21S4 the hose must by shortened. Simply unscrew one of the cuffs clockwise and cut off 12" from the hose. Replace the cuff by screwing it on counter-clockwise.

HONDA AIR CLEANER KIT

MODEL 3XAC-1

Fits 11L7 & 11J7 Series Models

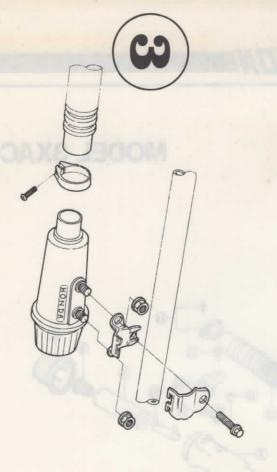

The following parts are replacement parts obtained from your Honda dealer.

Item	Honda Code	Honda Part No.	Description

16	47162	94050-05000	
17	28814	95014-62300	

SET-UP INSTRUCTIONS

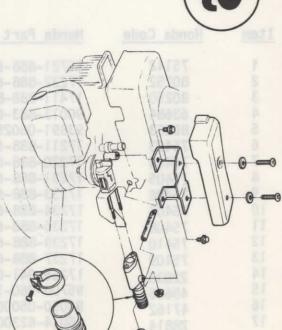

1. Remove the air cleaner cover and drill a φ7mm (0.28 in) hole in the location shown.

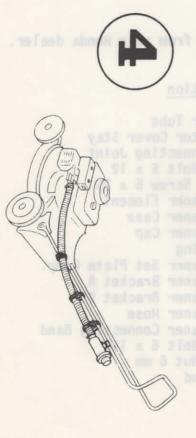

6. Connect the snorkel air cleaner to the hose and bind it with a tube band.
7. Install the snorkel to the handle as illustrated.

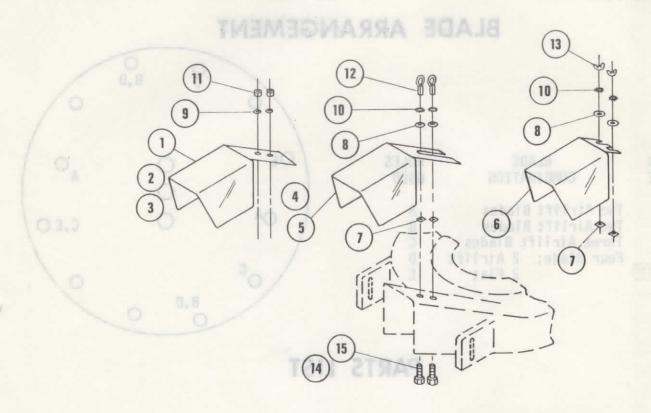

- Loosen two 6mm nuts and remove the air cleaner case.
 Install the breather tube (square cut end) on the connecting joint and install the joint on the carburetor with two 6mm nuts.
- 4. Install the breather tube (angled end) in the cylinder barrel as far as it will go.
- 5. Install the cover stay and the cover.

8. Clamp the hose to the handle with three wire bands.

THE SENSATION CORPORATION • OMAHA, NEBRASKA 68110 USA

Assembly

Dragshields on 1979 and earlier 21" models must be modified as per Fig. 1, or replaced with new dragshield(s) P/N 032-111 (front) and P/N 032-112 (rear), purchased separately.

- Remove wheel assemblies and axle bolts from wheels removed. Save the hex jam nuts for Step # 6.
- Two mounting holes are required in each deck wheel pad. These holes exist in some decks and others they do not. The holes must be positioned and drilled with a 7/16" drill bit as illustrated in Fig. 2 if they do not exist.
- There are two different sets of height adjustors: one for both right front and left rear, another for left front and right rear. Each is stamped accordingly with RF/LR or LF/RR. After selecting the correct height adjustor, choose the set of mounting holes in the height adjustor bracket according to the wheel size as illustrated in Fig. 3.
- 5) Models having a rear mount handle: The handle quadrant must be moved to the inside of the wheel pads. Mount the height adjustor to the deck (and the handle quadrant if so equipped) by inserting two 3/8 NC X 1-3/4 hex cap screws provided (Item # 10). Threaded ends must point into the deck. Secure with 3/8 lockwashers and nuts (Items # 11 & 12).
- 6) A. Aluminum Wheels: Spacer (Item # 13) must be slipped onto the axle before mounting wheel.
 - Steel Wheels: Mount wheel direct, do not use spacer (Item # 13).

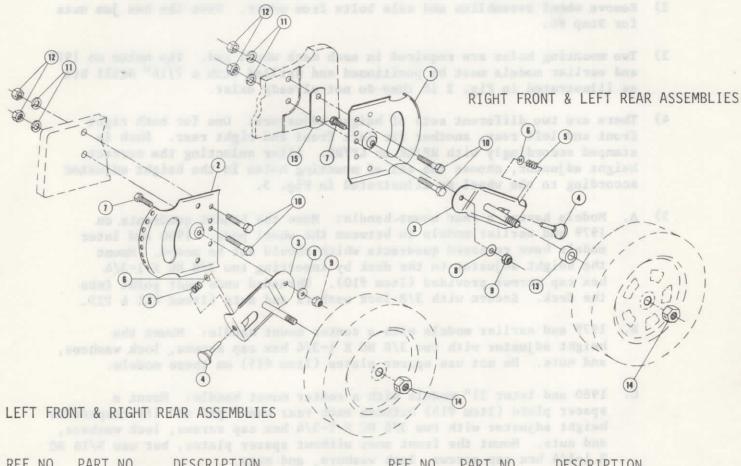

Secure wheel on axle with hex jam nut saved in Step # 1 (two provided in kit for "L" series models).

Pivot arm (Item # 3) should move freely with minimum side movement. If adjustment is required, remove height adjustor from mower and tighten the bolt and crownlock nut (Items # 7 & 9).

MODEL 3XHA-3

6	989-302	Push on Retainer, 1/4		*960-200	Nut 5/16 NC Hex
7	999-601	HCS 5/16 NF X 5/8 Special	13	273-212	Spacer 1/2 ID X 3/8
8	980-181	Washer 1/4 Flat	14	962-271	Jam Nut 1/2 NC
9	999-597	Crownlock Nut 5/16 NF	15	*213-115	Spacer Plate

Note: 1) Item 13 used with Mag Wheels only.

- 2) * Items used with 1980 and later models with center mount handles only.
- 3) Pivot arm (Item # 3) should move freely with minimum side movement. If adjustment is required, remove height adjustor from mower and tighten the bolt and crownlock nut (Items # 7 & 9).

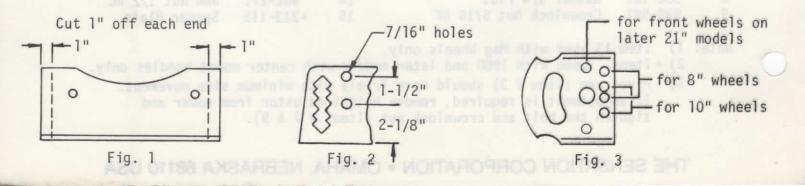

ASSEMBLY

 Dragshields on 1979 and earlier 21" models must be modified as per Fig. 1, or replaced with new dragshield(s) P/N 032-111 (front) and P/N 032-112 (rear), purchased separately.

ACAUTION: DO NOT OPERATE MOWER WITHOUT DRAGSHIELD ASSEMBLY(S) IN PLACE.

- Remove wheel assemblies and axle bolts from mower. Save the hex jam nuts for Step #6.
- 3) Two mounting holes are required in each deck wheel pad. The holes on 1979 and earlier models must be positioned and drilled with a 7/16" drill bit as illustrated in Fig. 2 if they do not already exist.
- 4) There are two different sets of height adjustors: One for both right front and left rear, another for left front and right rear. Each is stamped accordingly with RF/LR or LF/RR. After selecting the correct height adjustor, choose the set of mounting holes in the height adjustor according to the wheel as illustrated in Fig. 3.
- 5) A. Models having a rear mount handle: Move the handle quadrants on 1979 and earlier models in between the wheel pads. 1980 and later models have recessed quadrants which should not be moved. Mount the height adjustor to the deck by inserting two 3/8 NC X 1-3/4 hex cap screws provided (Item #10). Threaded ends must point into the deck. Secure with 3/8 lock washers and nuts (Items #11 & 12).
 - B. 1979 and earlier models with a center mount handle: Mount the height adjustor with two 3/8 NC X 1-3/4 hex cap screws, lock washers, and nuts. Do not use spacer plates (Item #15) on these models.
 - C. 1980 and later 21" models with a center mount handle: Mount a spacer plate (Item #15) between each rear wheel pad and its respective height adjustor with two 3/8 NC X 1-3/4 hex cap screws, lock washers, and nuts. Mount the front ones without spacer plates, but use 5/16 NC X 1-1/4 hex cap screws, lock washers, and nuts.
- 6) A. Aluminum Wheels: Spacer (Item #13) must be slipped onto the axle before mounting wheel.
- B. Steel Wheels: Mount wheels direct, do not use spacer (Item #13).

Secure wheel on axle with hex jam nut saved in Step #1 (two provided in kit for "L" series models).

5ENSATION 40" SNOW BLADE

MODEL 3XSB-O

IMPORTANT

Read and Save this Manual. It contains instructions for assembly, adjustment, maintenance, and lubrication of the unit. It also contains a complete parts list and diagram.

This unit is a high quality machine which will give good service if not abused. The manual has been prepared to assist you in obtaining the best results. Refer to it for aid in problems pertaining to operation and maintenance. For repairs other than adjustments mentioned in this manual, we suggest you take the machine to a competent repairman.

It is imperative in operating the machine that certain normal precautions be observed in order to prevent injury or damage.

UNIT PARTS SERVICE AND WARRANTY

A nation-wide Parts and Service Organization has been established to provide locally available parts and service on our products.

If you need parts or service on this machine contact the dealer from which you purchased your unit.

When ordering repair parts always give the following information: 1. The Part Name; 2. The Part Number; 3. The Quantity desired; 4. The Full Model Number which can be found on a plate attached to the unit.

The factory warranty policy will be honored at any of our Authorized Parts and Service Dealers in the field. Be sure to fill in and mail the warranty registration card packed with the unit.

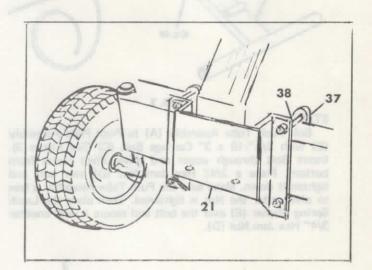

THE SENSATION CORPORATION . OMAHA, NEBRASKA 68110 USA

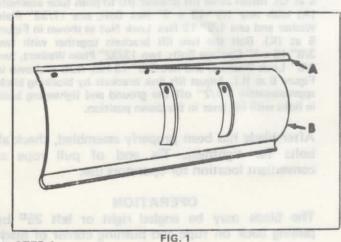

The Professional 40" snow blade is designed to fit the Sensation riders models 86S5, 80S8, and 80E8. The unit is shipped completely disassembled. By following the step by step instructions, considerable time and effort will be saved in assembly and mounting to the riding mower.

Rider Preparation

- 1. Position the mounting bracket (Item # 21 on the parts list) onto the front frame of the rider. Be sure that the bracket is mounted with angle cut off edge facing downward.
 - 2. Attach securely using mounting straps (Item # 37), bolts, lock washers, and nuts provided.

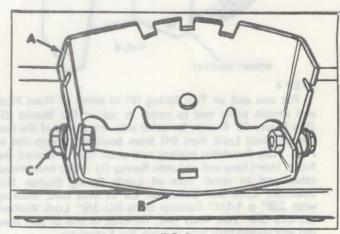

ASSEMBLY INSTRUCTIONS

STEP 1

Bolt adjustable Wear Bar (A) to Blade (B) with four 3/8"-16 x 1" Carriage Bolts, four 3/8" Lock Washers and four 3/8" Reg. Hex Nuts.

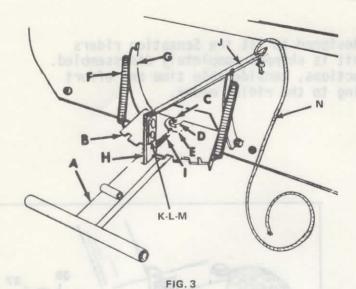

STEP 2

FIG. 2

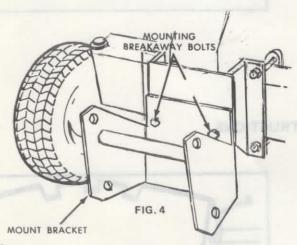

Attach Upper Pivot Plate (A) and Lower Pivot Plate (B) to Blade using two 1/2"-13 x 1-3/4" Hex Bolts (C), two 3/4" x 7/16" Pivot Bushings, two 17/32" Flat Washers and two 1/2" Hex Lock Nuts (See Figure 2).

STEP 3

Bolt Push Tube Assembly (A) to Pivot Plate Assembly (B) with 3/4"-10 x 3" Carriage Bolt (C) (See Figure 3). Insert Bolt through upper and lower Pivot Plates from bottom. Place a 3/4" Hex Jam Nut (D) over bolt and tighten it down. Make sure the Push Tube Assembly is free to pivot after the Nut is tightened. Then place the Latch Spring Washer (E) over the bolt and secure it with another 3/4" Hex Jam Nut (D).

STEP 4

Put one end of Trip Spring (F) in notch of Pivot Plate and stretch other end to notch in top of Bar Mount (G) (See Figure 3). Repeat for other side. Insert end of the two Pinned Pivot Lock Bars (H) from bottom through slot in Push Tube Assembly making sure small hole is toward the front. Insert long end of Latch Spring (I) in this hole. Hook other end in small hole of Latch Spring Washer (E). Assemble Lock Bar Extension (J) to lock bars, securing with 3/8" x 1-1/4" Carriage Bolts (K) 3/8" Lock Washers (L) and 3/8" Hex Nuts (M). Tie knot in end of pull rope (N) and thread thru hole in Lock Bar Extension.

STEP 5

Install Mount Bracket to tractor mount plate with two 1/4"-20 x 1" Hex Head (Breakaway) Bolts, two 1/4" Split Lock Washers, and two 1/4"-20 Hex Nuts (See Figure 4). Choose set of mounting holes which will center blade on tractor (Refer to tractor preparation section).

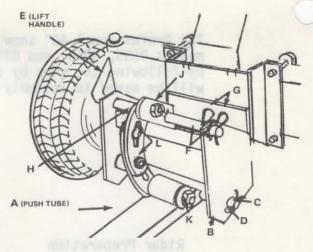

FIG. 5

CAUTION: Do not replace the two mount bracket mounting bolts with a harder bolt than the original equipment bolts. These bolts are intended to break away if blade hits a solid, unyielding object to protect the tractor frame.

STEP 6

Insert Push Tube (A) between lower holes in Mount Bracket (B). Push Pivot Rod (C) through mount bracket holes and push tube. Secure with two 5/32" x 1-1/4' Cotter Pins (D) as shown in Figure 5.

STEP 7

Install Lift Handle (E) through mounting bracket and secure with two 21/32" Washers (F) and two Hair Pin Cotters (G) as shown in Figure 5.

STEP 8

Install one Link Lift Bracket (H) with divet on bottom to the Lift Assembly (E) with one 1/2"-13 x 1-3/4" Hex Bolt, three 17/32" Washers between lift bracket and lift assembly and one 1/2"-13 Hex Lock Nut as shown in Figure 5 at (J). Install other lift bracket (H) to push tube assembly (A) with one 1/2"-13 x 3" Hex Bolt, one 17/32" Plain Washer and one 1/2"-13 Hex Lock Nut as shown in Figure 5 at (K). Bolt the two lift brackets together with two 3/8"-16 x 1" Carriage Bolts, two 13/32" Plain Washers, two 3/8" Lock Washers, and two 3/8"-16 Hex Nuts as shown in Figure 5 at (L). Adjust lift link brackets by blocking blade approximately 1-1/2" off the ground and tightening bolts in links with lift lever in the down position.

After blade has been properly assembled, check all bolts for tightness. Tie end of pull rope at convenient location for operators use.

OPERATION

The blade may be angled right or left 25° by pulling back on rope and pushing corner of bladagainst an obstacle (such as snow bank). Releas rope and blade angle will lock automatically in place. Keep all Pivot Points on snow blade lightly oiled. Tractor mount bracket may be left on tractor upon removal of snow blade. Disconnect at the two 1/4" breakaway bolts.

MODEL 3XWP-0

MOUNTING INSTRUCTIONS

- 1. Place the wear plate along the side of the deck, flush with the bottom and the weld nuts on top. Mark the two holes to be drilled.
 - 2. Drill the holes with a 5/16" drill bit.
 - Mount the wear plate with the hex cap screws pointing out of the deck as illustrated.
 - 4. Repeat on other side of deck

MOUNTING INSTRUCTIONS

- 1. Slide clamp (Item #8) over the end of the hose opposite the handle.
- Insert the hose plate (Item #9) into the same end with the 2 corner tabs towards bottom. Tighten the clamp over the hose plate.
- 3. With the engine shut off, loosen the 2 wing nuts on the impeller access door retainer.
- Open the access door and mount the hose assembly over the impeller opening. (See Fig. 1)
- Secure the retainer over the hose plate and re-tighten the wing nuts. (See Fig. 2)
